Section 1 – Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

Item 1.02 Exhibit

Conflict Minerals Report of Reynolds Group Holdings Limited in Accordance with Rule 13p-1 under the Securities Exchange Act of 1934

This is the Conflict Minerals Report of Reynolds Group Holdings Limited (“RGHL”) for calendar year 2013 in accordance with Rule 13p-1 (“Rule13p-1”) under the Securities Exchange Act of 1934 (the “1934 Act”). Please refer to Rule 13p-1, Form SD and the 1934 Act Release No. 34-67716 for definitions of the terms used in this Report, unless otherwise defined herein.

RGHL is engaged in the manufacture and sale of packaging products for the consumer, food, beverage and foodservice industries. RGHL operates through six segments: SIG (aseptic packaging); Evergreen (liquid paperboard packaging); Closures (plastic beverage caps and closures); Reynolds Consumer Products (consumer products including aluminum foil, plastic bags and plastic tableware); Pactiv Foodservice (plastic, paper and aluminum food and beverage packaging); and Graham Packaging (blow molded plastic containers).

We reviewed with each of our segments whether any conflict minerals are necessary to the functionality or production of a product manufactured by such segment or contracted to be manufactured by such segment. Each segment conducted a review of its product offerings and manufacturing processes and confirmed that it did not use conflict minerals in any of the packaging products it manufactured. Each segment also surveyed all of its vendors to determine whether any of the products the segment purchased as components for incorporating into its products contained conflict minerals. One segment had several vendors that supplied components that included conflict minerals; the substantial majority of such suppliers confirmed that the conflict minerals in their products were sourced from a location other than the Democratic Republic of the Congo or any adjoining country, and the remainder declared in good faith they were unable to identify the source of the conflict minerals in their products.

Based on this review, for calendar year 2013, RGHL has determined in good faith that either its necessary conflict minerals did not originate in the Democratic Republic of the Congo or an adjoining country or it has no reason to believe that its necessary conflict minerals may have originated in the Democratic Republic of the Congo or an adjoining country.

A copy of this Conflict Minerals Report is available on RGHL’s website at the following link:
